Email : samizenebe508@gmail.com

## PROFILE

Computer Science and Engineering student with strong practical experience in backend development using Java, Spring Boot, and REST APIs. Skilled in building secure applications with JWT authentication, clean architecture, and reliable data handling. Completed an internship at the Cooperative Bank of Ethiopia, contributing to a loan management system integrated with banking operations. Focused, fast-learning, and committed to producing high-quality software.

## WORK EXPERIENCE

### Cooperative Bank of Ethiopia

2025

Backend Developer Intern

- Developed backend modules using Java and Spring Boot.
- Implemented secure JWT authentication and user access control.
- Worked with MVC architecture for clean and maintainable code.
- Contributed to the Loan Management System integrated with bank operations.
- Built secure features for user account notifications and data handling.

## PROJECTS

### Online Shopping Platform (Java Servlets + React/Redux)

- Developed a full-stack shopping system with Java Servlets and MySQL.
- Created REST APIs for products, carts, and reviews.
- Built a React + Redux frontend that consumes all backend APIs.
- Designed structured endpoints for user and task management.

### Loan Management System Module

- Developed modules for loan processing and customer notifications.
- Improved backend logic and contributed to system integration.

## EDUCATION

### Bachelor of Science in Computer Science and Engineering

Adama Science and Technology University (ASTU)

Expected Graduation - 2027

GPA: 3.2 / 4.0
